

Windows 10

Win	Show the Windows 10 Start Menu
Win + Tab	Launch Windows 10 <i>Task View</i>
Win + Q	Search the web and Windows with Cortana (speech)
Win + S	Search the web and Windows with Cortana (keyboard input)
Win + C	Search not personal with Cortana (speech)
Win + I	Open Windows 10 settings
Win + A	Open Windows 10 notifications
Win + L	Lock your Windows 10 device
Win + Ctrl + D	Create new virtual desktop
Win + Ctrl + F4	Close current virtual desktop
Win + Ctrl + [Left][Right]	Switch between virtual desktops
Win + [Left][Right] [Up][Down]	Position windows on your screen E.g. Windows + [Left] moves the current window to the left half of your screen. If you use Windows + [Up] afterwards, the current window will be placed in the upper left quarter of your screen. And, what's very handy in my opinion: If you release the Windows key after positioning a window, Task View shows up on the opposite side of the positioned window to select & position another app.
Win + H	Share content (if supported by current app)
Win + K	Connect to wireless displays and audio devices
Win + X	Open <i>Start</i> button context menu
Win + G	Opens the Windows 10 <i>Game Bar</i> to take game screenshots and record gaming videos of Windows 10 games (works in any game app, e.g. <i>Microsoft Solitaire Collection</i>)
Win + D	Show Windows desktop
Win + E	Open <i>Windows Explorer</i>
Win + Space	Switch keyboard input language (if you have added at least a second one)
Win + Shift + [Left][Right]	Move current Window from one monitor to another (when using a multiple monitor setup)
Win + [1][2][3][...]	Open programs that are pinned to task bar E.g. if first pinned program on your task bar is Windows Explorer (from left to right), the shortcut <i>Windows + 1</i> opens <i>Windows Explorer</i> for you.
Win + R	Run a command
Win + P	Project a screen
Alt + Tab	Switch to previous window
Alt + Space	Restore, move, size, minimize, maximize or close current window. Also works like a charm for Windows 10 modern apps.
Alt + F4	a) Close current window b) If you're on your Windows 10 desktop, open Power dialogue to shut down or restart Windows, put your device in sleep mode, sign out or switch the current user

Win – Windows Key, it's on the left of the spacebar, at the bottom, showing a waving windows logo.
